SUBJECT INDEX

Aluminium polyfluorophthalocyanine
study of IF_5 chemical doping of $(PcAlF)_n$, 227
Aniline
polymerization of substituted, and characterization of polymers obtained, 99
Aniline oligomers
spectroscopic and electrical characterization of some, and polyaniline, 305
Anisotropic diffusion
and electron spin relaxation in single crystal $(fluoranthenyl)_2AsF_6$ above and below the metal–semiconductor phase transition, 161
Arsenic
anisotropic diffusion and electron spin relaxation in single crystal $(fluoranthenyl)_2AsF_6$ above and below metal–semiconductor phase transition, 161

BEDT–TTF salts
X-ray evidence for structural changes in organic conductors, α-$(BEDT–TTF)_2I_3$, α-$(BEDT–TTF)_2IBr_2$ and β-$(BEDT–TTF)_2I_3$, 367
Benzene
novel hexakis (alkylthio) benzene with C_3 symmetry; synthesis, crystal structure and physical properties of a tris-(ethylenedithio) benzene salt, $(TEDTB)_2BF_4$, 385
polymerization of, occluded in graphite–alkali metal intercalation compounds, 343
Bis(fluorosulfuryl)peroxide
oxidative intercalation of selected carbon fibers, by, 41
BMDT salts
organic metals: synthesis, structure and properties of $(BMDT–TTF)_2$-$Au(CN)_2$, 1
Bromine
pyrolysis of polyacrylonitrile prepared by electrochemical initiation and bromine doping of pyrolysis derivatives, 173

Calcium bis(oxalato)platinate
preparation and properties of the new one-dimensional conductor, partially-oxidized, 199
Carbon fiber(s)
oxidative intercalation of selected, by bis(fluorosulfuryl)peroxide, $S_2O_6F_2$, 41
supported cerium ions, catalytic reactivity of, in electro-oxidations, 87
Catalyst mixture
$Ti(OBu)_4$ in silicone oil, e.s.r. study, with regard to synthesis of homogeneous and highly conducting $(CH)_x$, 337
Catalytic reactivity
of carbon-fibre supported cerium ions in electro-oxidations, 87
Cerium ions
catalytic reactivity of carbon-fibre supported, in electro-oxidations, 87
Chain length
dependence of electrical conductivity of heavily-doped poly-*p*-phenylenes on, 55
Charge transfer
in situ e.s.r. study of intercalation of HNO_3 into highly oriented pyrolytic graphite; diffusion, and strain fields, 215
partial, in $HMTTeF–TCNQF_4$, 71
Conducting polymers
exchange-coupled pair model for non-Curie-like susceptibility in, 257
Conformational defects
in Durham-route polyacetylene, comments on; evidence for different conjugation length segments in *trans* polyacetylene; new resonance Raman scattering results, 381
Conformations
and dynamics of *cis* and *trans* polyacetylene molecules, 317
Conjugation length segments
evidence for different, in *trans* polyacetylene: new resonance Raman scattering results, 381

© Elsevier Sequoia/Printed in The Netherlands

Crystal structure
of a tris-(ethylenedithio) benzene salt: $(TEDTB)_2BF_4$, 385

Doping
in Durham polyacetylene, e.s.r. study of isomerization and, 265
Durham polyacetylene
e.s.r. study of isomerization and doping in, 265
Durham-route polyacetylene
comments on conformational defects in; evidence for different conjugation length segments in *trans* polyacetylene; new resonance Raman scattering results, 381
Dynamics
of *cis* and *trans* polyacetylene molecules, conformations and, 317

Electrical characterization
of some aniline oligomers and polyaniline, 305
Electrical conductivity
of heavily-doped poly-*p*-phenylenes, dependence of, on chain length, 55
of iodine-, iron chloride- and indium iodide-doped polyacetylene, 117
of α-quinquethiophene/stearic acid Langmuir–Blodgett films doped with iodine, 17
Electrically conductive
poly(isothianaphthene), facile preparation of, 379
Electrochemical initiation
pyrolysis of polyacrylonitrile prepared by, and bromine doping of pyrolysis derivatives, 173
Electrochemical polymerization
of pyrrole in aqueous solutions, 167
Electronic structure
of polyanilines; XPS study of electrochemically prepared compounds, 245
Electrons
SO_3-doped poly(*p*-phenylene sulphide); motion of electrons studied by frequency dependence of proton n.m.r. T_1^{-1}, 77
Electro-oxidations
catalytic reactivity of carbon-fibre supported cerium ions in electro-oxidations, 87
Electropolymerization
direct, of pyrrole-substituted ferrocene, 123

E.s.r. studies
of graphite HOPG/fluorine intercalation compounds, resistivity and, 349
of intercalation of HNO_3 into highly oriented pyrolytic graphite; diffusion, charge transfer and strain fields, *in situ*, 215
of isomerization and doping in Durham polyacetylene, 265
in single crystal $(fluoranthenyl)_2AsF_6$ above and below the metal–semiconductor phase, anisotropic diffusion and, 161
of $Ti(OBu)_4$ catalyst mixture in silicone oil with regard to synthesis of homogeneous and highly conducting $(CH)_x$, 337
Exchange-coupled pair model
for non-Curie-like susceptibility in conducting polymers, 257

Ferrocene
pyrrole-substituted, direct electropolymerization of, 123
Fluorine
anisotropic diffusion and electron spin relaxation in single crystal $(fluoranthenyl)_2AsF_6$ above and below metal–semiconductor phase transition, 161
oxidative intercalation of selected carbon fibers by bis(fluorosulfuryl)-peroxide, $S_2O_6F_2$, 41
study of IF_5 chemical doping of aluminium polyfluoronaphthalocyanine; $(PcAlF)_n$, 227

Geometry
of polyaniline, 31
Graphite–alkali metal
intercalation compounds, polymerization of benzene occluded in, 343
Graphite HOPG/fluorine
intercalation compounds, resistivity and e.s.r. studies of, 349
Graphite intercalation compound
ideal resistivity of acceptor, 93

Heteroatom effects
in heterocyclic ring chain polymers, 235
Heterocyclic ring chain polymers
heteroatom effects in, 235

Hexakis (alkylthio) benzene
with C_3 symmetry; synthesis, crystal structure and physical properties of a tris-(ethylenedithio) benzene salt, $(TEDTB)_2BF_4$, 385
HMTTeF
–$TCNQF_4$, partial charge transfer in, 71

Indium iodide
electrical conductivity of iodine-, iron chloride- and indium iodide-doped polyacetylene, 117
Intercalation
of HNO_3 into highly oriented pyrolytic graphite, *in situ* e.s.r. study of; diffusion, charge transfer and strain fields, 215
Intercalation compounds
graphite–alkali metal, polymerization of benzene occluded in, 343
graphite HOPG/fluorine, resistivity and e.s.r. studies of, 349
Iodine
electrical conductivity
of iodine-, iron chloride- and indium iodide-doped polyacetylene, 117
of α-quinquethiophene/stearic acid Langmuir–Blodgett films doped with, 17
quantitative optical study of I_2-doped polyacetylene, 133
study of IF_5 chemical doping of aluminium polyfluorophthalocyanine; $(PcAlF)_n$, 227
Iron chloride
electrical conductivity of iodine-, iron chloride- and indium iodide-doped polyacetylene, 117
Isomerization
and doping in Durham polyacetylene, 265

Langmuir–Blodgett films
electrical conductivity of α-quinquethiophene/stearic acid, doped with iodine, 17
Lattice expansion
around metal-to-insulator transition in $(TMTSF)_2PF_6$, 299

Metal-to-insulator transition
in $(TMTSF)_2PF_6$, lattice expansion around, 299
$MPht(TCNQ)_2$
spin ordering in ion-radical salt, 325

Nitric acid
in situ e.s.r. study of intercalation of, into highly oriented pyrolytic graphite; diffusion, charge transfer and strain fields, 215

One-dimensional conductor
preparation and properties of new, partially-oxidized calcium bis-(oxalato)platinate, 199
Optical properties
of $ZrTe_3$, 283
Optical study
of I_2-doped polyacetylene, quantitative, 133
Organic conductors
α-$(BEDT–TTF)_2I_3$, α-$(BEDT–TTF)_2IBr_2$ and β-$(BEDT–TTF)_2I_3$, X-ray evidence for structural changes in, 367
Organic metals
synthesis, structure and properties of $(BMDT–TTF)_2Au(CN)_2$, 1
Oxidative intercalation
of selected carbon fibers by bis(fluorosulfuryl)peroxide, $S_2O_6F_2$, 41

Polyetylene
conformations and dynamics of *cis* and *trans*, molecules, 317
Durham, e.s.r. study of isomerization and doping in, 265
e.s.r. study of $Ti(OBu)_4$ catalyst mixture in silicone oil with regard to synthesis of homogeneous and highly conducting $(CH)_x$, 337
evidence for different conjugation lengt length segments in *trans*-polyacetylene; new resonance Raman scattering results, 381
I_2-doped, quantitative optical study of, 133
iodine-, iron chloride- and indium iodide-doped, electrical conductivity of, 117
potassium-doped; influence of redox potential of dopants on doping level, 105
reaction of p-type doped, with H_2O, 291
Polyacrylonitrile
pyrolisis of, prepared by electrochem-

ical initiation and bromine doping of pyrolysis derivatives, 173
X-ray photoelectron spectroscopy of, 147
Polyaniline(s)
electronic structure of; XPS study of electrochemically prepared compounds, 245
geometry of, 31
spectroscopic and electrical characterization of some aniline oligomers and, 305
thermoplastic conversion of 'doped', from amorphous to partially crystalline state, 127
vibrational spectra of, and its ^{15}N- and ^{2}H-substituted derivatives in as-polymerized alkali-treated and reduced states, 189
Poly(isothianaphthene)
facile preparation of electrically conductive, 379
Poly-*p*-phenylenes
dependence of electrical conductivity of heavily-doped, on chain length, 55
Poly(*p*-phenylene sulphide)
SO_3-doped; motion of electrons studied by frequency dependence of proton n.m.r. T_1^{-1}, 77
Polythiophene films
influence of polymerization temperature on characteristics of, 207
Polymerization
of benzene occluded in graphite–alkali metal intercalation compounds, 343
of substituted aniline and characterization of polymers obtained, 99
Polymerization temperature
influence of, on characteristics of ' polythiophene films, 207
Potassium
-doped polyacetylene; influence of redox potential of dopants on doping level, 105
p-type doped polyacetylene
studies of reaction of, with H_2O, 291
Pyrolysis
of polyacrylonitrile prepared by electrochemical initiation and bromine doping of pyrolysis derivatives, 173
Pyrolytic graphite
in situ e.s.r. study of intercalation of HNO_3 into highly oriented; diffusion, charge transfer and strain fields, 215

Pyrrole
electrochemical polymerization of, in aqueous solutions, 167
Pyrrole-substituted ferrocene
direct electropolymerization of, 123

α-Quinquethiophene/stearic acid
Langmuir–Blodgett films doped with iodine, electrical conductivity of, 17

Redox potential
potassium-doped polyacetylene; influence of, of dopants on doping level, 105
Resistivity
and e.s.r. studies of graphite HOPG/fluorine intercalation compounds, 349
ideal, of an acceptor graphite intercalation compound, 93

Spectroscopic characterization
of some aniline oligomers and polyaniline, 305
Spin ordering
in ion-radical salt $MPht(TCNQ)_2$, 325
Structural changes
X-ray evidence for, in organic conductors, α-$(BEDT–TTF)_2I_3$, α-$(BEDT–TTF)_2IBr_2$ and β-$(BEDT–TTF)_2I_3$, 367
Sulfur
oxidative intercalation of selected carbon fibers by bis(fluorosulfuryl)-peroxide, $S_2O_6F_2$, 41
SO_3-doped poly(*p*-phenylene sulphide); motion of electrons studied by frequency dependence of proton n.m.r. T_1^{-1}, 77

TCNQ salts
partial charge transfer in HMTTeF–$TCNQF_4$, 71
spin ordering in ion-radical salt MPht-$(TCNQ)_2$, 325
$(TEDTB)_2BF_4$ salts
synthesis, crystal structure and physical properties of a tris-(ethylenedithio) benzene salt, 385
Tellurium
optical properties of $ZrTe_3$, 283
Thermoplastic conversion
of 'doped' polyaniline from amorphous to partially crystalline state, 127

Titanium
e.s.r. study of $Ti(OBu)_4$ catalyst mixture in silicone oil with regard to synthesis of homogeneous and highly conducting $(CH)_x$, 337
$(TMTSF)_2PF_6$
lattice expansion around the metal-to-insulator transition in, 299
TTF salts
organic metals: synthesis, structure and properties of $(BMDT–TTF)_2Au(CN)_2$, 1

Vibrational spectra
of polyaniline and its ^{15}N- and ^{2}H-substituted derivatives in as-polymerized, alkali-treated and reduced states, 189

XPS study
of electrochemically prepared compounds; electronic structure of polyanilines, 245
X-ray photoelectron spectroscopy
of polyacrylonitrile, 147

Zirconium
optical properties of $ZrTe_3$, 283
